This Vehicle's Glossary

Below are the specific definitions for events that appear in this vehicle's report.

Term	Section Location	Definition
Salvage	Title Problem Check	A salvage vehicle is a vehicle that has been wrecked or damaged beyond repair; declared a total loss by the insurer; or declared a total loss by reason of theft. When an insurance company as a result of a total loss settlement acquires a vehicle, the

insurance company must apply for a Salvage Certificate. If the owner retains possession of a salvage vehicle, the owner must obtain a Salvage Certificate before receiving a total loss statement from the insurance company.

Accident or Vehicle Damage	Vehicle Use and Event Check	Reported accidents or damage events are a result of vehicle collisions or other non-collision incidents such as vandalism or theft. Not all accidents or damage events are reported to AutoCheck. Certain accident or damage events are reported by the source to have resulted in minor, moderate or severe damage to the vehicle, or the events are calculated by AutoCheck to have resulted in minor, moderate or severe damage based on the information reported. It is recommended to have pre-owned vehicles inspected by a third party prior to purchase.
Emission/Safety Inspection	Vehicle Use and Event Check	An approved emission testing station has inspected the vehicle to measure the amount of pollutants the vehicle emits into the environment.
Loan/Lien	Vehicle Use and Event Check	A loan/lien is the legal right to take and hold or sell the vehicle of a debtor as security or payment for a debt. Normally, a vehicle will have a lien due to a loan or unpaid repair bill against the vehicle. Check with the seller to ensure that the lien has been satisfied.
Open Recall	Full History	A recall is considered 'open' for a vehicle when it has not received the required service to correct the safety concern. The vehicle will need to be taken to a repair center that has been authorized by the manufacturer to correct any open recall conditions.
Recall	Full History	A safety recall can be independently conducted by a manufacturer or ordered by the National Highway Traffic Safety Administration (NHTSA). In either case, the manufacturer must file a public report containing a description of the issue, the vehicles involved, and other information including a description of the solution. The manufacturer is obligated to provide a free remedy for vehicles involved in a safety recall.
